

PRODUCT REQUIREMENTS DOCUMENT (PRD)

Product Name

Project SkillForge (Working Title)

Tagline:

AI-Powered Learning. Human-Validated. Industry-Led.

1. Executive Summary

SkillForge is a next-generation EdTech platform that combines Artificial Intelligence, Human Expert Validation, Community-Driven Course Creation, and Industry Demand Intelligence to create highly relevant, trusted, and market-driven learning experiences.

Unlike traditional LMS platforms that decide what to teach, SkillForge enables learners, industry experts, employers, and AI systems to collaboratively identify, validate, build, and certify courses that address real-world skill gaps.

Every AI-generated component is reviewed and approved by qualified human experts before publication, ensuring compliance, quality, and trust.

2. Vision

Create the world's most trusted marketplace for industry-relevant skills where learners actively participate in deciding what knowledge gets created and certified.

3. Business Objectives

Year 1

- Launch platform MVP
- Build expert ecosystem
- Acquire 10,000 learners
- Launch 50 validated certifications

Year 2

- 100,000 learners
- Enterprise training division
- Industry partnerships
- Skill intelligence reports

Year 3

- Global expansion
 - Talent marketplace
 - Corporate workforce upskilling network
-

4. Product Goals

Primary Goals

Demand-Driven Learning

Build only courses validated by:

- User demand
- AI trend analysis
- Industry expert approval

Trusted AI

All AI-generated outputs require human validation before release.

Community Participation

Allow users to influence what gets taught.

Certification Integrity

Maintain high credibility through expert reviews and assessment governance.

5. Target Users

Learners

Needs:

- Career advancement
- Emerging skills
- Industry-recognized certifications

Pain Points:

- Irrelevant courses
 - Outdated content
 - Poor certification value
-

Industry Professionals

Needs:

- Share expertise
- Earn revenue
- Build reputation

Pain Points:

- Limited avenues to monetize expertise
-

Enterprises

Needs:

- Upskilling programs
- Workforce readiness
- Skill-gap visibility

Pain Points:

- Generic training platforms
-

Academic Institutions

Needs:

- Industry-aligned curricula
 - Future-ready learning paths
-

6. Core Platform Modules

Module 1: User Management

Features:

- Registration
- Authentication
- SSO
- RBAC
- User profiles

Roles:

- Learner
 - Expert
 - Reviewer
 - Enterprise Admin
 - Platform Admin
-

Module 2: Course Marketplace

Features:

- Browse courses
 - Skill categories
 - Search
 - Recommendations
 - Certification catalog
-

Module 3: Course Co-Creation Engine

Purpose:

Enable users to suggest future courses.

Features:

- Submit course ideas
- Vote on ideas
- Join waitlists
- Follow proposals

Workflow:

User → AI Structuring → Community Validation → Expert Review → Commissioning

Module 4: Trend Intelligence Engine

Purpose:

Identify emerging skills.

Data Sources:

- Job boards
- Industry reports
- Technology communities
- Research publications
- Search trend sources

Capabilities:

- Topic clustering
- Skill demand scoring
- Market trend prediction

Outputs:

- Emerging skill dashboards
 - Course recommendations
-

Module 5: AI Curriculum Generator

Purpose:

Accelerate curriculum creation.

AI Generates:

- Learning objectives

- Course outlines
- Module structures
- Assessments
- Project suggestions

Validation:

Mandatory human review before publication.

Module 6: Expert Validation Platform

Purpose:

Human governance layer.

Functions:

- Curriculum review
- Quality assurance
- Assessment approval
- Certification approval

Actions:

- Approve
 - Modify
 - Reject
 - Escalate
-

Module 7: Learning Management System

Features:

- Video lessons
- Interactive content
- Assessments
- Assignments
- Labs
- Discussion forums

Tracking:

- Progress
- Completion
- Skill achievements

Module 8: AI Learning Assistant

Capabilities:

- Personalized guidance
- Skill gap analysis
- Learning recommendations
- Course navigation

Restrictions:

- No direct publishing authority
 - Responses flagged as AI-generated
-

Module 9: Certification Management

Features:

- Certification issuance
- Digital credentials
- Verification system
- Skill badges

Requirements:

- Expert-approved assessments
 - Identity verification
 - Completion criteria
-

Module 10: Enterprise Learning Suite

Features:

- Private academies
 - Custom learning paths
 - Employee dashboards
 - Workforce analytics
-

7. Custom Course Commissioning Framework

User Submission

Inputs:

- Course topic
 - Target audience
 - Career outcome
 - Skill level
-

AI Evaluation

Generates:

- Draft curriculum
 - Demand estimate
 - Similar offerings
 - Industry relevance score
-

Expert Review

Evaluates:

- Demand
 - Feasibility
 - Market relevance
 - Certification potential
-

Commissioning Outcomes

Approved

- Added to roadmap
- Creator receives benefits

Rejected

- Feedback provided
-

8. Contributor Rewards Program

Course Proposers

Benefits:

- Early access
- Special pricing
- Recognition
- Contributor badge

Optional Future Phase:

- Revenue sharing
-

Community Contributors

Rewards:

- Points
 - Reputation score
 - Platform status levels
-

9. Compliance & Governance

Data Privacy

Requirements:

- User consent management
 - Data deletion requests
 - Data portability
 - Encryption
-

AI Governance

Requirements:

- Human review mandatory
 - AI output tracking
 - Audit trails
 - Bias monitoring
-

Certification Governance

Requirements:

- Expert approval
 - Assessment validation
 - Credential verification
-

Content Governance

Requirements:

- Plagiarism checks
 - Copyright review
 - Source attribution
-

10. Non-Functional Requirements

Security

- MFA
 - Encryption at rest
 - Encryption in transit
 - RBAC
-

Availability

Target:
99.9% uptime

Performance

Response Times:

- <2 seconds standard requests
 - <5 seconds AI-assisted workflows
-

Scalability

Target:

- 1 Million users
 - 50,000 concurrent sessions
-

11. Success Metrics

Product KPIs

- Monthly Active Users
 - Course Completion Rate
 - Certification Pass Rate
 - Retention Rate
-

Community KPIs

- Course proposals submitted
 - Proposal approval rate
 - Voting participation
 - Expert engagement
-

Business KPIs

- Revenue
 - Subscription growth
 - Enterprise customers
 - Customer acquisition cost
-

AI KPIs

- Curriculum generation time
- Human approval rate
- AI correction rate

Product Positioning

"SkillForge is the first AI-powered, human-validated learning ecosystem where industry demand determines what gets taught, experts ensure quality, and learners actively shape the future of education."
